Meteorologist's View

Nothing further to add.

Forecast for Wednesday 29 Nov 2023

Weather: Cloudy with patchy light sleet and snow overnight, but rain lower down, becoming dry and mainly clear by dawn with a frost possible. Dry and bright during the day with sunny spells. Clear skies in the evening with a widespread frost, freezing fog patches possibly forming in the valleys.

Maximum wind: North or Northeast 10mph

Chance of cloud-free hill tops above 800m: 80% during daylight hours, 30% overnight.

Low Cloud and visibility: Occasional or extensive, base 600m or less overnight, lifting and breaking around dawn. No significant low cloud expected during daylight hours. Visibility moderate to very poor at times overnight, but mostly very good during daylight hours.

Temperature: **Valleys:** Zero Celsius around dawn, rising to Plus 4 Celsius around the middle of the day.
At 800m: Zero Celsius falling to Minus 4 Celsius later
Freezing level: Around 800m then most levels by evening.
